

Latitude KiteBoarding **Installing twin-tip kite board** **User Manual**

**Thank you for choosing Latitude Kiteboarding board.
Here are the details for installing your twintip board:**

1. Check that you have all accessories for the board as follows:
 - 1.1. Board.
 - 1.2. Grab handle with 2 screws for connecting it to the board.
 - 1.3. Left & right footpads.
 - 1.4. Left & right foot straps.
 - 1.5. 4 screws with 4 square washers for connecting the foot straps.
 - 1.6. 4 fins.
 - 1.7. 8 screws, 8 Teflon washers (+8 conic washers in case of screws with conic head) all for connecting the fins to the board.

2. Start by connecting the grab handle to the board. This will help you hold the board for other accessories installation. Put the screws inside the handle holes & screw them to the there holes on the board as shown in the photo:

3. place the footpads in the location that fits your standing on the board – make sure that you put the left one for the left leg & the right one for the right leg:

4. Install the foot straps screws inside the neoprene sleeve on the tips of the foot straps. Start by folding the neoprene small screw cover on the tips & placing the screws on its location with its square washer. Make sure that the screw goes thru the washer, the foot strap thick webbing hole & the bottom strap webbing hole:

5. Connect one screw of the left foot strap (or the right foot strap) thru the footpad hole & to the board. Do not reinforce the screw:

6. Rotate the foot strap to its final location & connect the other screw to its place again thru the footpad base:

7. Do the same with the other foot strap. Make sure that both footpads located symmetrically:

8. Start connecting the fins to the board, fin by fin. Make sure that you put on the screw the Teflon washer & in case of conic head screws also the conic washer:
